BRING OUT THE **WOW**
FACTOR IN YOUR CAR

WWW.ONYXAA.COM

About Us

WHO WE ARE

ONYXAA is well known in the field of auto cleaning, detailing and paint protections services, with experience of decades. We have multiple outlets Pan India providing uncompromised services from years. We focus on customer service and satisfaction as our top priorities at affordable prices. We are driven by results and by customer satisfaction. At Onyxaa, the customer always comes first.

WHAT WE ARE SPECIALIZE IN

ONYXAA products are based on high global standards of nanotechnology, having molecular 3D structure. Our products are a unique ceramic molecular compound formula (Nano-ceramics) which is the most effective protection that retains its properties even in extreme weather conditions.

NANO CERAMIC COATINGS

WHEEL PRO

Onyxaa's Wheel Pro is specially designed to repel brake dust and dirt. Moreover, this coating can bond strongly on metal or aluminium surface, providing a robust protection.

PAINT COATING 9H

Onyxaa's 9H is a straightforward product with advanced technology that can preserve your vehicle in the top state. This long-lasting nano protective coating can provide long-lasting results along with a super glossy finish

MIRROR COATING

In terms of durability, our Mirror Coating lasts longer than the other ones. So, don't allow the rain to blur your vision through the side mirrors ever again

LEATHER PRO

Leather car seats are usually a vital choice for a vehicle. This is why you should choose Onyxaa leather pro because maintaining your vehicle's interior is as challenging as the exterior

PLASTIC PRO

With a promise of a life-long glossy finish, our Plastic Pro coating is infused with UV inhibitors that can deflect the harmful UV rays

ECO COAT LEATHER/PLASTIC

Onyxaa Eco Coat lets your vehicle maintains its flash and virtue and preserves the interiors for much longer

GRAPHENE COAT

Its advanced nano-technology with high flexibility and impermeability makes it the perfect coating to protect your vehicle's exterior.

ANTI FOG

Adding Onyxaa anti-fog coating to your vehicle ensures that you will never again face the issue of fogging in your car due to the change in temperature around you.

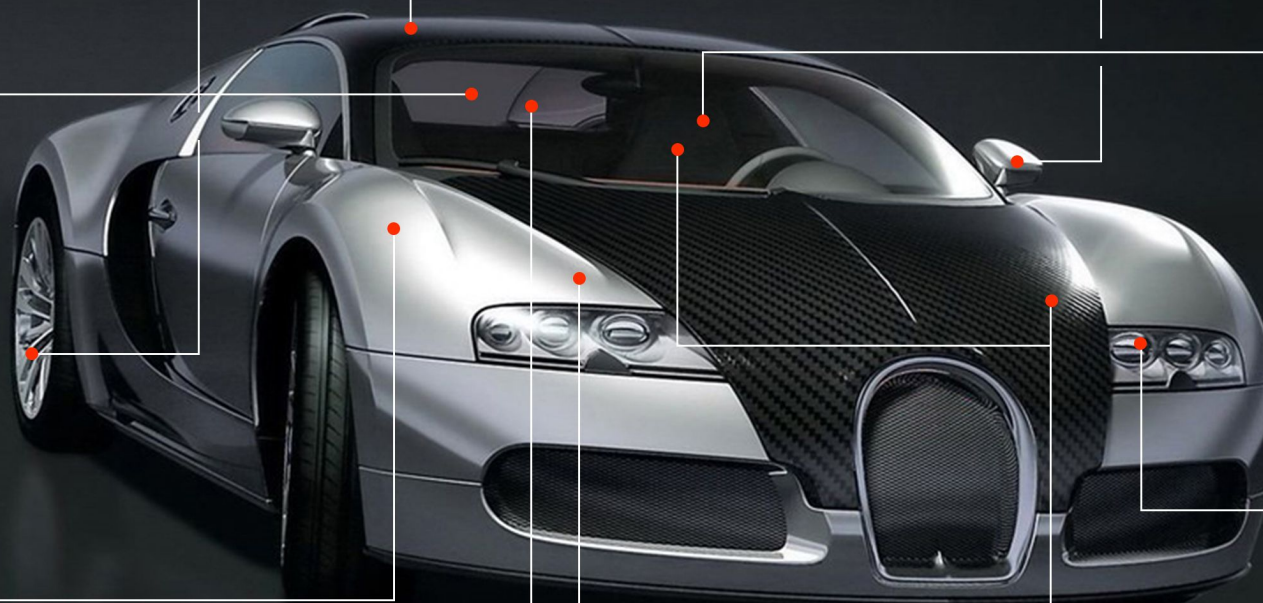

GLASS PRO

Onyxaa's Glass Pro is here for you to save your day. This nanocoating has stable colorless transparent compounds dispersed in alcohol which results in a robust hydrophobic effect.

PAINT COATING LIGHT

Onyxaa Light is a protective coating that features a high gloss finish, super hydrophobic effect, chemical resistance, UV resistance, thermal resistance and anti-graffiti effect.

ONYXAA

PAINT COATING

9H

Onyxaa's 9H is a straightforward product with advanced technology that can preserve your vehicle in the top state. This long-lasting nano protective coating can provide long-lasting results along with a super glossy finish. Once applied to your car's painted surface, this 9H coating can form a robust layer of protection to save it from harmful UV rays, acid rains, hard water stains, corrosion, etc.

With strong hydrophobic effects, our 9H coating can be applied to any surface and provide protection from harmful scratches, chemical and can repel mud easily. Moreover, the final finishing of this coating can leave a super-glossy touch on your car's paint job. Also, due to the presence of strong chemical bonds, you cannot wash away this coat quite easily. Similarly, it can create a strong shield around your car's paint that can repel all kinds of water contaminants like algae, dirt, etc.

Lastly, with additional features such as thermal resistance and anti-graffiti nature, it's hard to find a product like Onyxaa's 9H coating. So, make sure you choose only our 9H coating to protect your car's surface from different harmful external forces.

FEATURES OF ONYXAA 9H COATING

1. **Applicable on every automotive paint surface.**
2. **Long-lasting results with high durability.**
3. **Above 9H hardness and permanent protection.**
4. **Super-hydrophobic effect.**
5. **Additional features such as gloss finish, thermal resistance and UV protection.**
6. **100% Eco-friendly and biodegradable.**

ONYXAA

PAINT COATING

LIGHT

Onyxaa Light is a protective coating that features a high gloss finish, super hydrophobic, chemical resistance, UV resistance, thermal resistance and anti-graffiti effect.

Surface after coating will remain cleaner for long time. This Unique formulation of Onyxaa enables it to apply multiple times for better results. It can be applied over Onyxaa 9H also to increase Gloss and Hydrophobic Effect.

The super hydrophobic effect of the coating will cause water to bead up and roll off the surface along with any dirt and grime

Onyxaa Light top coat dries quickly, providing a glossy look to your car. Moreover, the top coat is weather and chemical resistant, hence making it applicable to any sort of automotive. Offering a plenty of coverage, so you get well-deserved work for your money on your vehicle.

FEATURES OF ONYXAA PAINT COATING LIGHT

1. **Super Hydrophobic Effect**
2. **Weather & UV Resistance**
3. **High Gloss Finish**
4. **Anti-Graffiti**
5. **Advanced Chemical Resistance**
6. **Oxidation & Corrosion Resistance**

ONYXAA

WHEEL
PRO

If you're looking for a nano-coating that can protect your car's wheel surface for a longer duration, then you're in the right place. Onyxaa's Wheel Pro is specially designed to repel brake dust and dirt. Moreover, this coating can bond strongly on metal or aluminium surface, providing a robust protection. Due to this protection, Wheel Pro offers more scratch resistance and better hydrophobic properties than other coatings.

At Onyxaa, our philosophy is focused only on providing maximised protection for your car and accessories. Thus, Wheel Pro is scientifically made to offer long-lasting results and high durability. Its hydrophobic and anti-graffiti properties ensure that wheels will remain clean for a longer duration.

The hard protecting of nanolayers also ensures that your wheel surface is resistant to environmental damage.

So, whether it be dirt or UV rays, Wheel Pro's nano-coating can take care of them quickly. Lastly, it adds that supreme glossy finish so that you can outshine others and bring back the lost charm of your wheels.

Remember that your car's wheels are most prone to lose their shine and get damaged due to external elements. Thus, choosing the best coating for your vehicle's wheels should remain on your priority list.

ADDITIONAL FEATURES OF WHEEL PRO

1. **Top-quality protection against roadside dust and chemicals.**
2. **Adds a glossy finish and easy-to-clean.**
3. **Provides extra security against harmful UV rays.**
4. **Unmatched hydrophobic and anti-graffiti properties.**
5. **Long-lasting results and high durability.**

ONYXAA

LEATHER

PRO

Every vehicle owner wishes that their vehicle looks meticulous every time. The vehicles can be made so by not just maintaining them from the outside but also on the inside. Thus for that, leather has always played an essential role in it. Leathers are like the icing on the cake for reflecting your lavish and classy taste in car interiors.

Leather car seats are usually a vital choice for a vehicle's interior. But the more lavish it looks, the more careful you have to be with it. The majority of the car interiors get faded, damaged, and torn, resulting from the UV rays and warmth. So, carrying out a routine care and keeping up with it can increase your leather's life. Besides, it will keep your vehicle clean and enhance the looks of your interiors.

This is why you should choose Onyxaa leather pro because we understand that maintaining your vehicle's interior is as challenging as the exterior.

Our nano-coating for car leather surface helps your vehicle maintain its radiance and resiliency and protects the surface for a more extended period.

FEATURES OF THE LEATHER PRO

1. **Applicable on leather surfaces of the interiors.**
2. **The application is durable for at least a year.**
3. **Hydrophobic and adds gloss to the interiors.**
4. **Stain-free, with anti-ageing or cracking of the surface.**
5. **Non-greasy and adds to the life of the leather.**

ONYXAA

PLASTIC

PRO

With a promise of a life-long glossy finish, our Plastic Pro coating is infused with UV inhibitors that can deflect the harmful UV rays. In addition, this coating ensures that just a quick wipe down with a damp cloth can enhance your car's glaze and surface shine. Also, it neutralizes all airborne contaminants so that your vehicle doesn't require cosmetic repairs after a short time.

Onyxaa's Plastic Pro is one of the most effective coating solution available in the market and offers highly durable results. Lastly, to offer life-long results, the philosophy of our products are solemnly based on molecular relationships. Due to the strong polar amines bond, our Plastic Pro coating remains intact with the car's surface and provides long-lasting results.

FEATURES OF PLASTIC PRO

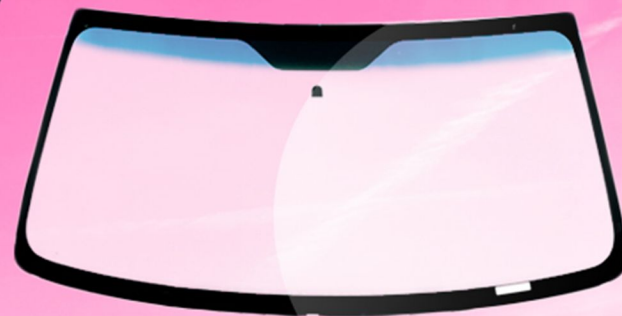

1. **Applicable on plastic surfaces of both interiors and exteriors.**
2. **Strong molecular binding to prevent the fading.**
3. **Non-greasy and adds a glossy touch to the car's paint job.**
4. **Complete protection from UV rays, road gravels and acid rain.**
5. **Highly Durable and long-lasting results.**
6. **100% Eco-friendly**

ONYXAA

GLASS

PRO

Looking through your car's windshield when it's raining can frustrate you like nothing else, and it's pretty dangerous as well. But, Onyxaa's Glass Pro is here for you to save your day. This nanocoating has stable colorless transparent compounds dispersed in alcohol which results in a robust hydrophobic effect. So, you don't have to clean your car's glasses regularly, as this coating can create a self-cleaning effect.

Onyxaa's Glass Pro is a scientifically designed product that can provide long-lasting results for your windshield treatment. Also, in terms of durability, our Glass Pro can last longer than silicon-based alternatives in the market. Due to its strong hydrophobic nature, it can prevent rain droplets from clinging to your car's windshield. Now, whenever it's raining outside, you don't have to blur your vision while driving, as this coating ensures a superior visual clarity.

Lastly, apart from saving your windshield from raindrops, Glass Pro also protects from harmful UV rays and offers anti-scratch resistance as well. We can bet that you will not find any other product for your car's glasses that can provide such enhanced features with long-lasting results. So, don't hesitate anymore. Choose Onyxaa's Glass Pro today and ensure your safety while driving on a rainy day.

FEATURES OF ONYXAA GLASS PRO

1. **Provides a superior visual clarity in the rain.**
2. **Additional protection from UV rays and harmful scratches.**
3. **Offer long-lasting results with high durability.**
4. **Strong hydrophobic nature.**
5. **100% Eco-friendly**

ONYXAA

ANTI

FOG

While you're on the wheel, you might want to protect your windows and windshield. Thus, you might want to use Onyxaa anti-fog coating for all those surfaces of your vehicle that get foggy.

While fogged-up glasses are temporary issues, they are frustrating as well as dangerous. Also, while driving being able to see clear through the glasses is vital. Besides, having a clear vision while driving is a matter of death and life.

Fogging is an issue that almost every driver has faced at least once in their lives. But the more surprising part is that many people use their hands or turn up their air conditioner to get rid of it.

Nonetheless, one can prevent the effects of condensation easily. However, you get a variety of anti-fog solutions. You can choose from a range of wipes, spray and waxes. However, all of these are a solution temporary.

To get rid of the fogginess for good, you might need a permanent solution for it. Hence, Onyxaa anti-fog coatings, an advance nanocoating technology, ensure that you don't ever face the issue of fog ever again.

Adding Onyxaa anti-fog coating to your vehicle ensures that you will never again face the issue of fogging in your car due to the change in temperature around you. The highly durable coating will protect your windows, mirrors and, most importantly, windshields from issues relating to fog.

FEATURES

1. **Works correctly in high temperatures as well as high humidity environment.**
2. **It does not reflect any anti-reflective coating.**
3. **Long-lasting results with high durability**
4. **100% Eco-friendly and Non-toxic**

ONYXAA

GRAPHENE COAT

Adding a graphene coating to your vehicle is a must, as along with protecting your car, it also gives it a remarkable visual appeal. Moreover, it helps your vehicle reduce the heat on the surface of the paint. Its advanced nano-technology with high flexibility and impermeability makes it the perfect coating to protect your vehicle's exterior.

Our Graphene Coating is a carbon-based nanomaterial and has a very high water contact angle compared to most of the coatings available in the market. Thus, any moisture of any amount will slide off, leave less to no chance of making water spots on your car. Moreover, this coating provides an exceptional and irresistible glossy finish. With N1 smoothness and a layer protection of up to 1000nm, it's pretty tricky for any other product to beat our Graphene Coating.

Onyxaa Graphene coating is an advanced technology for your automotive. In simple terms, graphene is used to enhance the strength of other materials. Additionally, because of its electrical and thermal conductivity properties, graphene coatings help in repelling dust off of your car. Thus, adding Onyxaa Graphene coating to your vehicle proves to be 'anti-static.'

FEATURES OF GRAPHENE COAT

1. **Water spot reduction and prevention**
2. **Hydrophobic and enhanced durability for 5 years at a minimum.**
3. **Higher Abrasion Resistance because of its durability**
4. **High slickness**
5. **Wet lustrous appearance with a glossy finish.**
6. **100% Eco-friendly**

ONYXAA

ECO COAT

LEATHER/PLASTIC

Coating your automotive can change the colour or revive your car's faded and chipping leather and plastic. However, many people do not realize that you get to choose between eco-friendly and traditional coatings.

The eco-friendly coat is waterborne, and they are different from the traditional coatings that use petrochemical products. Waterborne coatings are greener as water is used as a diluent to disperse resin instead of organic solvent, which are considered a Volatile Organic Compound.

Thus, we provide you with Onyxaa Eco Coat for your automotive's plastic and leather surfaces. The most notable benefit of using the Onyxaa Eco Coat is that it is better for the environment and your vehicle.

Moreover, Onyxaa Eco Coat lets your vehicle maintains its flash and virtue and preserves the interiors for much longer.

You might even find this coating relatively cost-effective and budget-friendly than others. Moreover, Onyxaa Eco Coat is a scientifically designed product with features like easy blending and excellent coverage.

It sometimes seems harsh between choosing an effective coat or the one suitable for the environment. Fortunately, when you choose Onyxaa Eco-coat, you choose both an effective coating for your car and a coating good for the environment.

FEATURES OF ONYXAA'S ECO COAT

1. **Completely water-based coating.**
2. **Long-lasting results with high durability.**
3. **Cost-effective and easy on the budget.**
4. **100% Eco-friendly.**

ONYXAA

MIRROR
COATING

It's pretty frustrating when we try to switch the lanes, but the raindrops obstruct our vision through side mirrors. Moreover, this obstructed vision can prove to be very dangerous while driving. But, don't worry, as Onyxaa's Mirror Coating is the perfect solution for this issue. With the help of nano-technology, our Mirror Coating repels the water droplets excellently and offers you a clear vision in rains. Our transparent coating is scientifically designed so that it can provide long-lasting results.

Its super-hydrophobic nature enables this coating to work as a perfect water-repellant. As in terms of durability, our Mirror Coating lasts longer than the other ones. So, don't allow the rain to blur your vision through the side mirrors ever again.

Unlike other coatings, when you choose Onyxaa's Mirror coating, you also contribute to the environment safety. Here at Onyxaa, we believe in sustainability and eco-friendliness. Thus, all our products, including Mirror Coating, are eco-friendly and biodegradable. In short, we make sure that we are keeping the environment safe while also ensuring your vehicle's protection.

Lastly, we can ensure that no other coating will provide you with such long-lasting results in today's market. So, make sure you don't make any mistake and choose Onyxaa's Mirror Coating only.

FEATURES OF ONYXAA'S MIRROR COATING

1. **Super-hydrophobic nature**
2. **Improves rear-view visibility extraordinarily in the rains.**
3. **Long-lasting results with high durability.**
4. **100% Eco-friendly.**

Uses for: Bathroom Mirror | Bathroom Cubicals | Car Side Mirrors | Building Glass

ONYXAA

PHOTOCATALYTIC

PRO

We all know that UV rays are quite harmful to any human skin but do you know that the same UV rays can damage your car's interior too.

ONYXAA PC is a photocatalyst coating having high photocatalytic efficiency.

Photocatalysis describes a chemical reaction which is accelerated by light. A photocatalyst is a substance that causes this reaction without being involved itself. A photocatalyst coating is a coating that contains photocatalysts as ingredients.

A photocatalyst coating, in the presence of daylight and visible light, is energized by that light.

The excitation of the photocatalyst causes a number of reactions at the surface of the coating. This light stimulation of the Photocatalyst transforms the coated surface so that it has air purifying and self-cleaning functionality.

Onyxaa's Photocatalytic treatment is an entrusted and scientifically approved process that can save your car from UV rays. Our Photocatalytic treatment includes a high gloss protective barrier that can neutralize UV rays and save your vehicle's interior from fading. Moreover, its safe reactive polymer technology can maintain your car's appearance for a long time.

With a highly durable performance and long-lasting results, Onyxaa's Photocatalytic treatment is the best shield to save your vehicle from harmful UV rays.

FEATURES OF PHOTOCATALYTIC TREATMENT:

The main functions and features

Comprehensiveness: Photocatalyst can greatly decompose formaldehyde, benzene, toluene, xylene, ammonia, TVOC and other pollutants, and has high-efficiency and broad-spectrum disinfectant performances. It can decompose the toxin releasing from bacteria or fungi and do harmless treatment.

Security: Photocatalyst is non-toxic, harmless, safe and reliable for human.

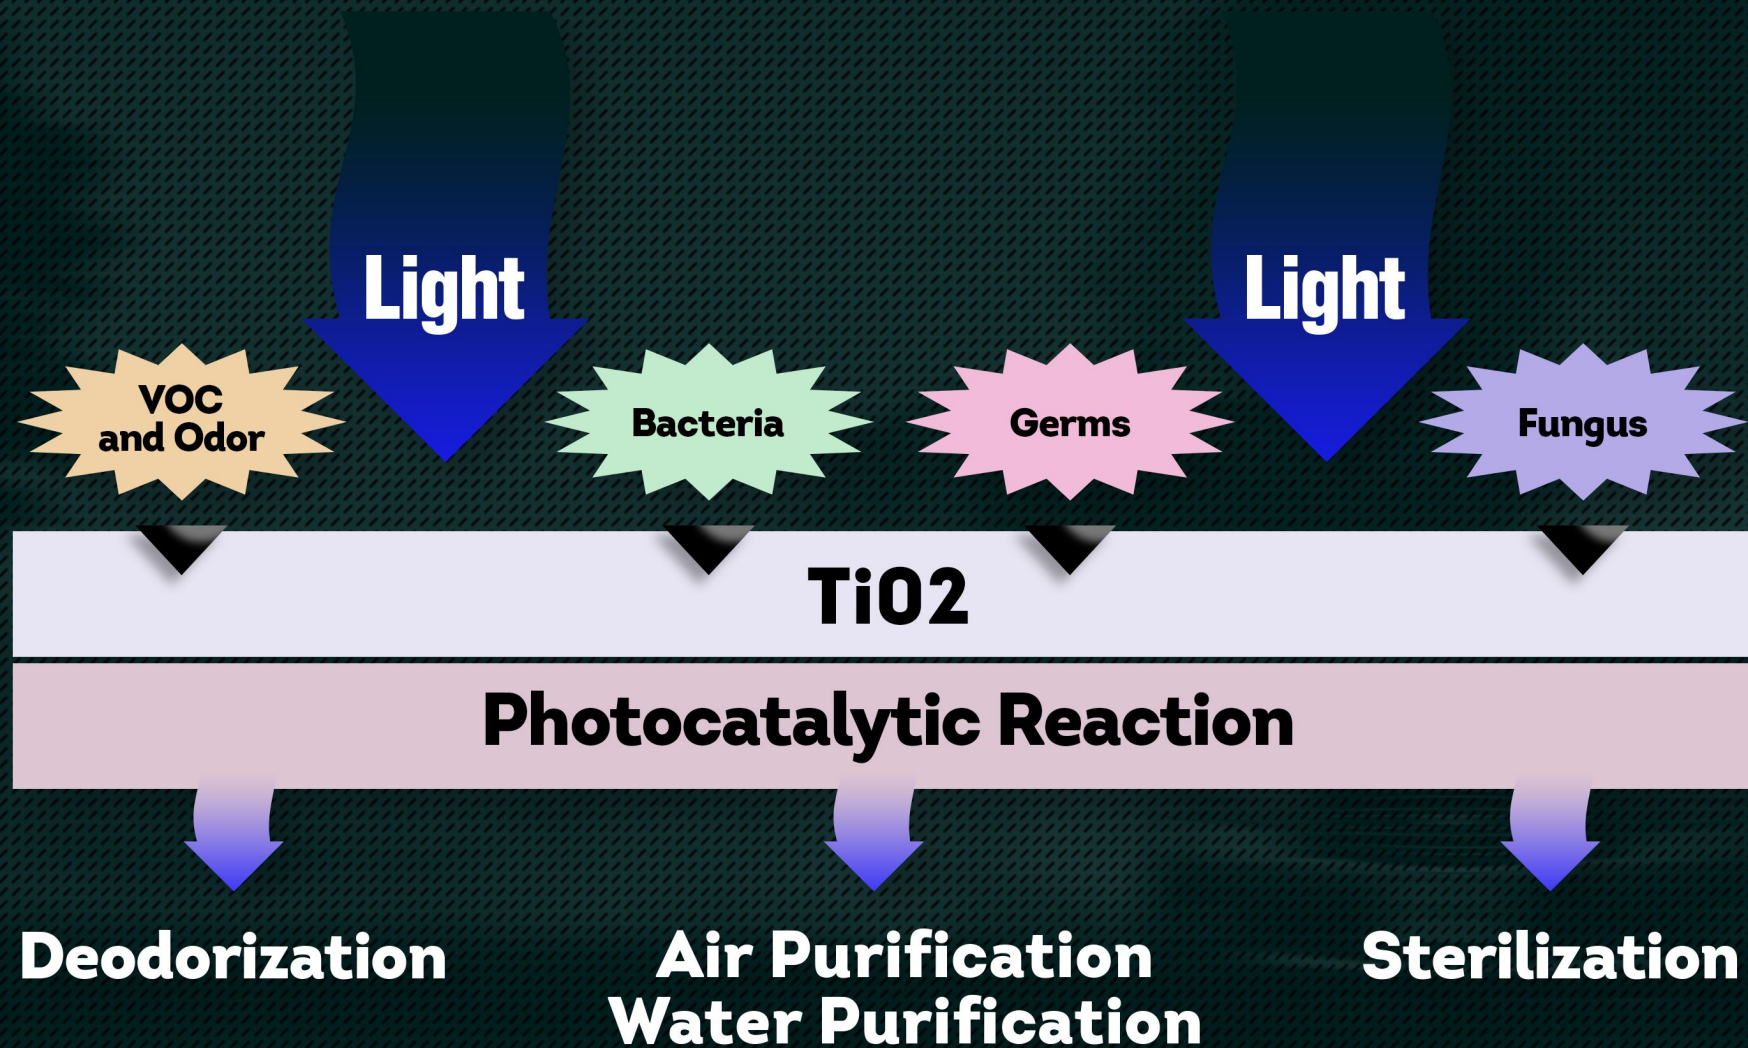

Efficiency: Photocatalyst can decompose the pollutants that spread in the air under the effect of the inexhaustible solar energy or other lights.

Deodorizing Effect: Effectively decomposes the air around us by strong oxidation decomposition capacity

Anti-Bacterial Effect: Utilizes the strong oxidation capacity to kill bacteria and suppress the multiplication of bacteria

Self-Cleaning Effect: The protective film of TiO_2 provides the self-cleaning function by becoming antistatic, super oxidative and hydrophilic.

Air Purifying Effect: Photocatalyst accelerates the oxidation process in the atmosphere and decomposes any air borne toxic organic matters
